The Swiss Platform for a sustainable use of natural resources. We bring together decision-makers from government, sciences, as well as research institutes in Switzerland.

The conference

Leading organizations in resources management in Switzerland have come together to introduce the second Swiss Resources Forum (rf-ch 2018), to be held at the Empa-Akademie in Dübendorf, October 25, 2018. The overall topic of the conference is “Science, business and cities together for more resource efficiency”, tackling abiotic resources and highlighting the importance of their primary extraction, exploitation and recycling in Switzerland. By gathering decision-makers from various sectors, the conference will create the necessary space for knowledge exchange and idea generation towards “Resource Revolution” in Switzerland.

General Sponsorship Benefits
