Encouraging continuous improvement in responsible mining

RMI 2018 assesses 30 large-scale, geographically dispersed mining companies on key economic, environmental, social and governance (EESG) issues.

Together these companies represent approximately 25% of the global value of mining production, cover 51 producing and home countries, and account for over 850 operating and 140 closed mine sites.

As well as measuring company-wide behaviour, RMI assesses action on EESG issues at the mine-site level, in order to provide site-disaggregated data of direct relevance to mining-affected stakeholders in producing countries.

Companies assessed

Anglo American
AngloGold Ashanti
Antofagasta
ArcelorMittal
Barminco
Barrick Gold Corp
BHP
Bumi Resources
Coal India
CODELCO
ERG
Evaaz
Exxaro Resources
Freeport-McMoRan
Glencore
Gold Fields
Goldcorp
Gruppo Mexico
Industrias Peñoles
MMG
Navoi MMC
Newcrest Mining
Newmont Mining
NMDC
Rio Tinto
Teck Resources
UC RUSAL
Vale
Vedanta Resources
Zijin

Home countries, where companies are headquartered
Producing countries, where companies have mining operations
Mine sites selected for mine-site-level assessment

A. Economic Development
B. Business Conduct
C. Lifecycle Management
D. Community Wellbeing
E. Working Conditions
